Subject: Stock material and PED compliance

Dear Sir/Madame'

As you know, Bergens and Stavanger Rørhandel have a considerable amount of products manufactured by your company in our stocks. Many of these products are manufactured prior to the implementation of PED 97/23/EC within the European Community in May 2002.

In order to satisfy the recommendations given by the competent body Det Norske Veritas, you are kindly requested to complete the enclosed questionnaire. The questionnaire is meant to confirm the status of current deliveries and historic deliveries. **You are also kindly requested to enclose copies of valid certificates with your completed questionnaire.**

With our mutual focus on quality during our relationship over the past years we trust you are able to confirm our requests, enabling us to put stock materials into the market as compliant with PED.

If you have any questions related to the questionnaire, please take contact with Marit Wallevik (+47 5594 4852), Ingve Stangeland (+47 5181 8559) or Finn Ove Lysen (+47 5594 4820)

We hope you are able to answer this letter within 14 days and thank you for your cooperation in this matter.

Best Regards

Bergens Rørhandel & Stavanger Rørhandel
